

## Fitting and care advice for locking system cylinders

As part of the technical development of our products, the lubricant for our locking cylinders has been adapted to the state-of-the-art.

**The Special Lubricant SP 99 is characterised by:**

- Excellent lubricating properties
- Good wear protection
- Displaces water
- Infiltrates moisture
- Dissolves rust, dirt and residues
- Protects against corrosion
- Seals surfaces
- Free from silicones and acids

**Please use our Special Lubricant SP 99, art. no. 4460-0099**

*Attention: Do not re-lubricate the locking cylinders with graphite!*
