ALL IN ONE CUTTING & ENGRAVING

SEMI-INDUSTRIAL KEY CUTTING MACHINE

- \ **Cut, mark and engrave** cylinder, dimple and vehicle keys on a single machine.
- \ **Configurable and flexible.** Designed to incorporate different accessories as new requirements arise.
- \ **Aspiration kit.** Clears away swarf for a consistently optimal machining environment. Can be added at any time during the life of the machine.
- \ **Clamps, adaptors and interchangeable vices** compatible with the NXT family (Multicode NXT and Supracode NXT).

MÁQUINA DUPLICADORA SEMIINDUSTRIAL

- \ **Duplica, marca y graba** llaves de serreta, puntos y automoción en un mismo equipo.
- \ **Configurable y flexible.** Diseñada para incorporar nuevos accesorios según vayan surgiendo necesidades.
- \ **Kit de aspiración.** Aspira la viruta, para un entorno de duplicado siempre óptimo. Integrable a lo largo de la vida útil de la máquina.
- \ **Mordazas, adaptadores y garras intercambiables** y compatibles con la familia NXT (Multicode NXT y Supracode NXT)

JMA[®]

JMA[®] Opening
the future

Concerning the marks and commercial denominations see legal warning.
Concerniente a las marcas y denominaciones comerciales ver aviso legal.

EVOXPERT UPDATE 2.11

1/ ADD security protocol https to TP JMA Website (jma-tp.com).

Due to IT security protocol new regulation in JMA (measure that has been gradually implemented), we had to move our transponder website (jma-tp.com) from using unencrypted http protocol to encrypted https one.

There wasn't any problem neither into main updating procedure nor into the rest of transponder features but unfortunately, this change didn't allow the updating of the EVOX's FW Remote part.

This affect to all the devices with main updating review < 2.03.

WARNING!!!!

IT IS MANDATORY UPDATE ALL THOSE OLD DEVICES NOW!!!!

Small corrections and improvements

Added/ Fixed:

- **ADD:** It has been added a datalog register system into EVOX to enable collecting DATA from customer device, (if there was a problem), to be analysed later, at JMA by technical support people.

The button to trigger the data collection is EXPORT LOG and it is placed into SYSTEM UPDATE MENU / MAINTENANCE.

- **ADD:** We've introduced a download manager that monitors the success of the Updating procedure.

If the downloading of the files did not end successfully, the program warn you and automatically launches again the FW back-up updating of the Micro.

- **ADD:** We have inserted a new verifying procedure to check if TPX is right set into sniff Mode. Sometimes HT2 did not evolve into the following states because TPX was wrong set. From now on, there is a new reading to confirm that chip is right set into Sniff Mode before going to collect data to the car.

- **ADD:** Within the bottom bar where some active icons are located, by clicking in the server icon (fourth from the bottom left), we access to the server status where we can view at a glance, all the services & server state.

Thus, you always stay up-to-date on the status of the servers and associated services before starting to program a key.

EVOXPERT - ACTUALIZACIÓN 2.11

1/ INCORPORACIÓN de protocolo de seguridad https a la web TP JMA (jma-tp.com).

Debido a la nueva normativa sobre protocolos de seguridad informática de JMA (medida que se ha ido implementando gradualmente), hemos tenido que cambiar nuestro sitio web de transpondedores (jma-tp.com) del protocolo http sin cifrar al protocolo https cifrado.

No hubo ningún problema ni en el procedimiento de actualización principal ni en el resto de funciones del transpondedor, pero, lamentablemente, este cambio no permitió la actualización de la parte FW Remote del EVOX. Esto afecta a todos los dispositivos con revisión de actualización principal < 2.03.

¡ADVERTENCIA!

¡ES OBLIGATORIO ACTUALIZAR TODOS ESOS DISPOSITIVOS ANTIGUOS AHORA MISMO!

Pequeñas correcciones y mejoras

Incorporado / Corregido:

- **INCORPORADO:** Se ha añadido un sistema de registro de datos en la EVOX para permitir la recopilación de DATOS del dispositivo del cliente (si hubiera algún problema), que posteriormente serán analizados en JMA por el personal de asistencia técnica.

El botón para activar la recopilación de datos es EXPORT LOG y se encuentra en el MENÚ DE ACTUALIZACIÓN DEL SISTEMA / MANTENIMIENTO.

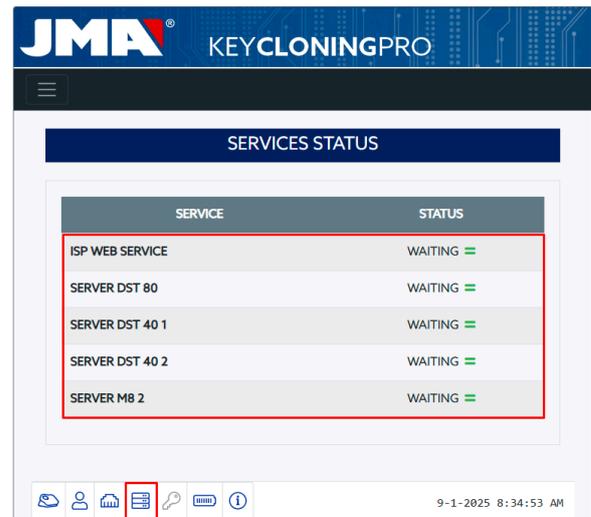

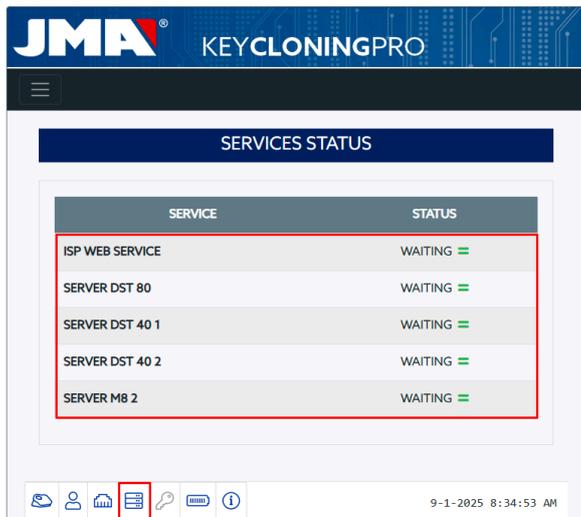

- **INCORPORADO:** Hemos introducido un gestor de descargas que supervisa el éxito del procedimiento de actualización. Si la descarga de los archivos no finaliza correctamente, el programa le avisa y vuelve a iniciar automáticamente la actualización de la copia de seguridad del FW del Micro.

- **INCORPORADO:** Hemos insertado un nuevo procedimiento de verificación para comprobar si TPX está correctamente configurado en modo sniff. A veces, HT2 no evolucionaba a los siguientes estados porque TPX estaba mal configurado. A partir de ahora, hay una nueva lectura para confirmar que el chip está correctamente configurado en modo sniff antes de ir a recopilar datos al coche.

- **INCORPORADO:** En la barra inferior, donde se encuentran algunos iconos activos, al hacer clic en el icono del servidor (el cuarto desde la parte inferior izquierda), accedemos al estado del servidor, donde podemos ver de un vistazo todos los servicios y el estado del servidor.

De este modo, siempre estará al día del estado de los servidores y los servicios asociados antes de empezar a programar una llave.

EVOXPERT UPDATE

- **FIX:** We have modified different parameters of HT2 function to avoid being preparing sniffs or waiting for the original key over and over.

From now on, Data is also stored in the cloud (before only in the device) and we have reduced the amount of data exchanged between EVOX and the cloud during the whole HT2 cloning procedure.

- **CORREGIDO:** Hemos modificado diferentes parámetros de la función HT2 para evitar la demora mientras se prepara un Sniff o la espera a la llave original.

A partir de ahora, los datos también se almacenan en la nube (antes solo en el dispositivo) y hemos reducido la cantidad de datos intercambiados entre EVOX y la nube durante todo el procedimiento de clonación HT2.

Legal warning

Aviso legal

The keys that appear in this catalogue are JMA parts manufactured by Alejandro ALTUNA S.A. or one of its subcontractors. They are designed for cylinders and locks made by the manufacturers whose trademarks are indicated in this catalogue. In accordance with legal requirements relating to industrial property rights, the trademarks or trade names indicated in this catalogue are the exclusive property of the manufacturers of the cylinders and locks, as well as automobile manufacturers, other constructors, distributors and users. The aforementioned trademarks or trade names are indicated simply for information purposes so that the lock to which our parts correspond can be recognised quickly and easily.

This catalogue is for the exclusive use of professional key copiers who use JMA parts. Data referring to the products in this catalogue are indicative in nature. Although the basic characteristics are maintained at all times, we reserve the right to make, without previous notice, any technical, aesthetic or other types of changes involved in the development of the products in question. Some of the keys in this new catalogue could be received either with the JMA reference and trademark or with another trademark from the ALTUNA group.

Las llaves que aparecen en este catálogo son piezas JMA fabricadas por Alejandro ALTUNA S.A. o un subcontratista de éste. Están diseñadas para cilindros y cerraduras de los fabricantes cuyas marcas se indican en este catálogo. Conforme a las disposiciones legales vigentes relativas a la propiedad industrial, las marcas o nombres comerciales indicados en este catálogo son propiedad exclusiva de los fabricantes de cilindros y cerraduras, así como de los fabricantes de automóviles, otros constructores, distribuidores y usuarios. Dichas marcas o nombres comerciales se indican en calidad simplemente informativa con el fin de reconocer con rapidez la cerradura a la que corresponden nuestras piezas.

Este catálogo está reservado exclusivamente a profesionales de la reproducción de llaves que utilizan piezas JMA. Los datos referentes a los productos de este catálogo tienen carácter indicativo. Manteniendo siempre las características básicas, nos reservamos el derecho de realizar, sin previo aviso, modificaciones técnicas, estéticas o de otro tipo, por razones de evolución de los productos en cuestión. Algunos modelos que están en este nuevo catálogo podrán recibirlos tanto con la marca y la referencia JMA como con otra marca del grupo ALTUNA.
